

ZH-250827--the 100ml and 150ml plastic bottle with a secure tear-off lid, designed to meet the evolving needs of pharmaceutical, nutraceutical, and confectionery industries. Crafted from high-quality, food-grade PP or HDPE materials, this container ensures exceptional durability, chemical resistance, and product safety. Its compact yet practical design is optimized for storing chewing gum, medicine pills, vitamins, milk calcium tablets, capsules, sugar candies, and dietary supplements.

The innovative tear-off lid provides an airtight seal, protecting contents from moisture, oxygen, and contamination while offering tamper-evident functionality. This feature is critical for medical tablets, health supplements, and edible products requiring stringent hygiene standards.

Available in two versatile sizes (100ml and 150ml), this bottle is ideal for solid packaging applications across industries. Its lightweight design reduces shipping costs, while the stackable structure optimizes storage efficiency. As a custom manufacturer, we offer extensive OEM/ODM services, including logo printing, color matching, shaped design□surface treatment and size adjustments to align with your brand identity.
