

ZH-MB105 is an oil-sprayed thickened PET plastic wide-mouth can product, currently available in sizes ranging from 10 to 250g. This product is made of high-quality PET material. The appearance of the jar is not only elegant and beautiful but also very durable.

After undergoing the surface treatment process of frosted and oil spraying, the appearance of the can is more like that of glass material. However, compared with glass PET material, it has more advantages. Not only is the cost lower, but the safety of the product is also more guaranteed. It is less likely to break like glass, causing certain safety hazards. The design of the thick-walled structure not only gives this product the first impression of a glass appearance, but also enhances its stability and provides people with a high-end and luxurious experience.

This type of jar has a wide range of uses and is suitable for eye creams, facial essence lotions, body oils, solid creams, lip balms, etc. It is the top choice for the outer packaging of skin care, hair care and health care products.

As a professional manufacturer of plastic bottles and cans, Zhenghao can offer tailor-made solutions, including size selection, material choice, shape design, logo printing, surface treatment, etc
